

Large Carousel Range

Introducing movement from Movetech UK to the showroom will bring the excitement of an exhibition to the sales floor, helping to attract customers and increasing sales. Our larger carousels will allow you to create stunning displays with lots of impact.

Our Maxi Plus Carousel range are well suited to generating simple, but unique, full circular platform displays, or they can be combined with other movement in our range and, for instance, imaginative lighting effects, to create something really special that stops customers in their tracks.

There are two versions of our standard Maxi Plus Carousels: the Maxi 1000 which is 1m in diameter and has a maximum distributed load of up to 500kg, and the Maxi 1500 which is 1.5m in diameter with a maximum distributed load of up to 700kg.

NOTE: Maximum display properties assume evenly distributed load.

Extension Kits

Extensions kits are available to increase the display area diameter up to 1.8m, 2.5m or 3m in diameter. The 1.8m kit can only be used with the 1m Maxi Plus Carousel (D-006-MP1000) or the 1m Maxi Plus Ultra Carousel (D-006-MP1000U). The 2.5 or 3m kit can only be used with the 1.5m Maxi Plus Carousel (D-006-MP1500).

Product features

- ⚙ Speed of rotation: Variable approximately 0.6-1.1 RPM (0-6 – 8RPM for 'Ultra' units).

Revolving Stages

In the retail and exhibition industries movement adds a dynamic dimension to product display. For the events, film and TV industries a Movetech UK revolving stage can create spectacular film sequences or TV commercials. They can also be used to create impressive product launches and reveals by moving the audience or the merchandise as required.

Revolving signs

A revolving sign mechanism from Movetech UK can give you the competitive edge. Ideal for a wide variety of locations, both indoors and out, a revolving sign will attract attention, whether inside a shopping mall, an exhibition or on top of a multi-storey building.

Small Carousels

Our small carousel range includes the Mini Carousel, B25 range and B200 range. The B25 range is a fully finished, versatile and reliable mains powered turntable range, ideal for creating compact window or counter displays. The B200 range offers heavier duty display turntables suitable for more substantial displays.

PoS Turntables

Movement acts as the ideal mechanism to increase sales (POPAI research suggests by up to 30% over a static display). Whether you are displaying the latest brands or high value goods, a battery-operated solution will allow you to create an attractive solution wherever it is needed.
